**Muhammad Zaryab Ali**

has successfully completed the online, non-credit Specialization

# Highway Planning, Pavement Design and Construction

This certificate acknowledges the successful completion of the Highway Planning, Pavement Design, and Construction specialization by L&T EduTech. The recipient has gained expertise in highway planning, drainage design, traffic flow optimization, and pavement material testing, including CBR and bituminous properties. They have developed skills in designing flexible and rigid pavements using IITPAVE software and regression equations. The program also covers construction practices, project planning, and monitoring, ensuring adherence to IRC and MoRTH standards. With a focus on sustainability and durability, this certification signifies proficiency in highway design and execution for modern road infrastructure.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
