**Muhammad Zaryab Ali**

has successfully completed the online, non-credit Specialization

# Infrastructure for Transportation Systems

This specialization certifies expertise in designing and managing sustainable urban transportation systems through three courses on metros, airports, and highways. The "Metro Rail Transportation & Construction" course covers MRTS and TOD needs, MRTS technologies, feasibility studies, metro design, construction methods, and essential safety systems. The "Airport Infrastructure" course addresses modern airport planning, aviation codes, site selection, airside element design, terminal building design, and construction techniques for runways and taxiways. The "Highway Geometry and Pavement Design" course provides an overview of the Indian highway system, geometric design principles, pavement construction materials, and methodologies for flexible and rigid pavements.
